Hi Cindy, Tim, and Sally,

Attached below is the updated Economic Snapshot. Hope you have a nice weekend!

Best regards,

Cindy

Thanks Sally. I did see a minor error on the snapshot for GSENM. The Date of Designation should be 9/18/1996. The report shows 9/19/1996.
I'll keep my eyes open for the final report in mid July.

Hi Cindy,

Our report is close to being released. I expect by mid-July. We plan to post it on our website, along with the economic snapshots for the monuments and NCAs.

Sally & Tim:

Can you tell me if this report has been released?

A Utah University is working on an Economic Analysis of GSENM and they are asking us for any prior/current reports that we know about. We can direct them to quite a few published reports, including Headwaters, but it would be nice to share this report with them.

Thanks

Allison and Cindy,
I uploaded an economic snapshot ("2016 Economic Snapshot - Grandstaircase-Escalante National Monument) in the Grand Staircase-Escalante/Economics folder on the google drive.

These 2016 snapshots were developed for each BLM national monument as part of a broader report entitled "An Analysis of the Economic Effects of

National Conservation Lands." The report was developed and reviewed in coordination with Rebecca Moore (BLM Federal Economist) and other federal economists. The analysis uses established methodologies developed by the National Park Service. BLM leadership has been briefed on the report and key statistics and we're just finishing up a few loose ends on the report before we can release the entire report.

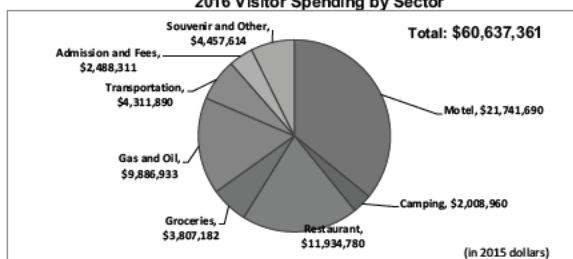

We don't have a similar snapshot for Bears Ears because it's so new.

Please let me know if you have any questions.

Sally

<small>Sources: Visitation and visitation growth data were gathered from DOI's Recreation Management Information System, as accessed on December 2016. Visitation growth data may be based on fewer than 15 years due to data availability. Acreage, budget, and volunteer hours are as reported in BLM FY15 Managers' Reports. The value of volunteer contributions was calculated using state by state value per hour of volunteer time from Independent Sector estimates. Economic contributions results were estimated by assigning visitor characteristics and spending patterns based on visitor surveys of the nearest NPS unit (Thomas and Koontz 2015). Contributions results were calculated from IMPLAN economic modeling.</small>
